

Are there specific cleaning or conditioning requirements for G3's wood pepper and salt grinders

Cleaning and conditioning is simple. Use mild soap and water on a damp soft cloth to wash it, and of course do not submerge it in the water. You can also use any good furniture wax like Johnson's Furniture Wax, but do not use automotive wax. Automotive wax contains abrasives that will scratch the finish on the wood pepper mills and grinders. Trust us our wood pepper grinders and salt mills are made to be used and meant to last.
